

Science:

1. A stored energy that is a result of an object's height above the surface of the earth.
a. gravitational potential energy c. thermal energy
b. kinetic energy d. Resistance
2. Kinetic and potential energy associated with the motion of an object.
a. Volt c. potential energy
b. Mechanical energy d. Electric potential
3. The stored energy that is a result of the position or shape of an object.
a. Falling object b. Weight energy **c. Potential energy** d. Farad
4. The original position an object returns to when all forces acting upon it is removed.
a. Equilibrium position_ c. Gravitational energy
b. Elastic Energy d. Resistance
5. Mechanical Energy consists of both potential and _____ energy.
a. Electric energy **c. kinetic**
b. Insulator d. Short circuit

Social Studies:

1. What is a population map?
a. a map that shows you about population.
b. a map that shows you about physical geography.
c. a map that shows you about roads and places.
d. a map that shows you about countries that border.
2. What is a topographic map?
a. a map that shows you about physical geography.
b. a map that shows you about roads and places.
c. a map that shows you about countries that border.
d. a map that shows you about population.
3. Which map shows you about roads and places in town?
a. road map b. political map c. topographic map d. population map
4. Which map shows you about countries border?
a. road map **b. political map** c. topographic map d. population map
5. If you plan to go to Chiang Mai zoo, which map would you choose?
a. road map b. political map c. topographic map d. population map

Health Education:

1. In our nervous system, what does **CNS** stand for?
 - a. Chiangmai National School
 - b. Central Nucleus Step
 - c. Central Nervous System**
 - d. Center Nervous System
2. Which part of your nervous system is made up of somatic and autonomic nervous system?
 - a. somatic nervous system
 - b. central nervous system
 - c. autonomic nervous system
 - d. peripheral nervous system**
3. What is the center of higher nervous activity?
 - a. body
 - b. brain**
 - c. cell body
 - d. somatic
4. Which organ contains light receptors?
 - a. eyes**
 - b. nose
 - c. tongue
 - d. ear
5. Which statement is true?
 - a. The CNS is made up of the brain only.
 - b. The PNS is made up of the spinal cord.
 - c. The PNS is made up of somatic and autonomic nervous system.**
 - d. The CNS is made up of the brain and somatic nervous system.
