a. is **b. travels** c. will d. be

Mathematics:

1. What do you call the line from the eyes to the object of observation?
a. Horizontal b. angle of elevation
c. Line of Sight d. angle of depression
2. What do you call the line with the same level of the eyes of the observer?
a. Line of sight **b. horizontal**
c. Angle of Elevation d. Angle of Depression
3. What is the angle formed by the horizontal and the line of sight of the object above the horizontal?
a. Horizontal **b. Angle of Elevation**
c. Line of Sight d. Angle of Depression
4. What is the angle formed by the horizontal and the line of sight of the object below the horizontal?
a. Horizontal b. Angle of Elevation
c. Line of Sight **d. Angle of Depression**

5. From the point in the level ground, the angle of elevation of the top of building A is 60° while the angle of elevation of the top of building B is 45° . Given that the two buildings have the same distance from the point in the level ground, which of them is taller?

a. Building A

b. Building B

Science:

1. Which microorganism has a hypha?

a. bacteria

b. fungi

c. protozoa

d. viruses

2. _____ is the smallest microorganism.

a. bacteria

b. fungi

c. protozoa

d. virus

3. Bacillus is one of the shapes of _____.

a. bacteria

b. protozoa

c. algae

d. virus

4. Paramecium is a _____.

a. bacteria

b. protozoa

c. algae

d. virus

5. Tadpole shaped is one of the shapes of _____.

a. bacteria

b. protozoa

c. algae

d. virus
